

# hello tue15-kora!

(if that's your tute code, you're in the right place)

# what's happening today?

- intros & temporary art class??
- some admin
- discussion about programming in C
- trekking to labs at J17 so you can write some code!

# introductions

introduce yourself (incl.  
name & year/degree)

[optionally] undo the  
previous instruction

give an instruction to draw  
the flower

# any admin questions?

- purpose of tutorials: interactive & supplement lectures
- accessing the course website
- course forum (!)
  - programming questions / general course questions go here
- [ada.luong@unsw.edu.au](mailto:ada.luong@unsw.edu.au) (first point of contact)
  - programming questions will be redirected to the forum
- [cs1511@cse.unsw.edu.au](mailto:cs1511@cse.unsw.edu.au) (course email)

# let's look at some code

- what does the `///  
• what has been indented in this code and why?  
• why is the \n in there?`

```
// Basic Hello World program  
// Marc Chee, September 2020
```

```
#include <stdio.h>
```

```
int main (void) {  
    printf("Hello World\n");  
  
    return 0;  
}
```

what does the `//` lines do?

what has been indented in this code and why?

why is the `\n` in there?

Login:

## let's look at some code

what would i need to change to print a smiley?

```
  ~ ~  
  0 0  
  o  
 \_/  
  _
```

```
// Basic Hello World program  
// Marc Chee, September 2020
```

```
#include <stdio.h>
```

```
int main (void) {  
    printf("Hello World\n");  
  
    return 0;  
}
```

## getting ready for the lab

- press `use default config` button
- lab questions on course website
- due dates
- how to submit
